

Before $x + y = z$ after.

Fraction: $\frac{a}{b}$

Fraction of sums: $\frac{x+1}{x-1}$

Skewed: a/b

Superscript: x^2

Subscript: a_n

Both: x_i^2

Root: $\sqrt{x+1}$

Cube root: $\sqrt[3]{x}$

Delimited: $(a+b)$

Delimited fraction: $\left(\frac{a}{b}\right)$

Sum: $\sum_{i=1}^n i^2$

Integral: $\int_0^1 x \, dx$

Function: $\sin x$

The quadratic formula:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Matrix: $\begin{smallmatrix} 1 & 2 \\ 3 & 4 \end{smallmatrix}$

Accented: $\tilde{x}$
